WORK EXPERIENCE

Leading IT Specialist

October 2023 – Present

Teleradiocomplex of the President of the Republic of Kazakhstan, Astana

- Provided uninterrupted technical support and high-quality broadcasting of media events involving the Head of State and top government officials.
- Monitored, maintained, and supported specialized television broadcasting servers powered by Cinegy software.

AI Development & Projects:

- Deployed, configured, and administered Linux-based servers to establish robust development environments and launch AI agents.
- Participated in the full-cycle development of innovative AI products from scratch: designed system architecture, collected datasets, and trained an AI-driven digital news anchor model.
- Successfully designed and implemented an AI-powered system to automate the preparation of technical specifications and streamline the selection of ENS TRU (Unified Nomenclature of Goods, Works, and Services) codes.

Software Engineering:

- Designed and developed a robust desktop application (Windows Forms, C#) to monitor the stability and quality of real-time streaming video broadcast via the SRT protocol.
- Ensured fault tolerance and maximum resilience of the network infrastructure dedicated to live, real-time media content delivery.

Leading Administrator

April 2023 – October 2023

Management Company "Kazmedia Ortalygy" LLP, Astana

- Coordinated administrative staff operations, optimized daily task allocation, and enhanced team productivity.
- Introduced and streamlined operational workflow processes to improve organizational efficiency.
- Ensured reliable, high-quality performance of television broadcast equipment in strict accordance with the technical service level regulations (SLA) for partner TV channels.
- Administered automated broadcasting environment configurations within the "Cinegy" and "Dalet Galaxy" systems.

Assistant System Administrator

May 2022 – April 2023

Technical Competence Center "DEMEU" LLP, Astana

- Maintained, monitored, and administered server hardware and corporate operating systems.
- Installed, updated, and verified software packages and core operating system components.
- Configured and managed user accounts, access permissions, and corporate security policies.
- Maintained comprehensive inventory records, lifecycle documentation, and technical support logs for the IT infrastructure.
- Organized and automated active monitoring workflows to verify the overall health and uptime of IT hardware.

Communications Systems Operator

July 2020 – May 2022

Apparatus of the Akim of Ulan District (State Institution), Ust-Kamenogorsk

- Guaranteed uninterrupted operation of telecom networks and conducted technical health checks on communication systems.
- Monitored and managed information routing and data packets within local telecommunication infrastructures.
- Collaborated with specialized technical support and senior engineers to optimize the baseline performance of communication systems.

| EDUCATION

L.N. Gumilyov Eurasian National University (ENU)

September 2016 – June 2020

Astana, Kazakhstan

- **Degree:** Higher Education (Bachelor's Degree)
